Supagas attitude

Supagas is famous for its can-do attitude. Exceptional customer service underpins every part of our business. We've grown through teamwork and a strong sense of personal responsibility.

We seek to anticipate customer demands, remain flexible and be prepared for the unexpected.

Supagas is the industrial gas company that turns challenges into solutions – whether it's down the road or across the nation.

Supagas difference

Supagas is a 100% Australian owned company supplying a complete range of gases and services Australia wide.

The company delivers bottled gases, bulk liquid gases and specialty gases from state-of-the-art manufacturing and laboratory facilities.

Supagas was started generations ago by three brothers racing around Melbourne delivering gas better than anyone else.

That competitive spirit still drives the company as it expands into new markets. The family is still very much hands on.

Most recently, the company is proud to be supporting the offshore oil and gas industries as well as mining in remote parts of the country.

Our competitive advantage is based on reliable delivery, fast and personal responses to queries and outstanding customer service.

It's our attitude that makes us different.

Supagas is a major supporter of oil and gas production and mining operations with significant production and distribution facilities in Karratha and Darwin.

The Karratha operation is the largest liquid nitrogen, oxygen and argon production facility in the Pilbara enabling Supagas to offer outstanding support – whether it's long-distance deliveries or highly responsive turnaround for off-shore operations.

Supagas is the sole producer of acetylene in Darwin. Remote Australia is supported by production and distribution facilities in Adelaide and Darwin. Wherever we operate, we supply a full range of industrial and welding gases, tools, equipment and consumables.

We are a solutions partner working with our customers on planned project and supply chain as well as urgent and unplanned gas requirements. Our services include supply and delivery of Bulk and Cylinder Gases, logistics solutions, Nitrogen Purging and Inerting services.

The Supagas difference is above-and-beyond customer support backed by state-of-the-art production facilities and networked logistics.

We're always prepared for a challenge. Whenever. Wherever.

Offshore Certified Racks

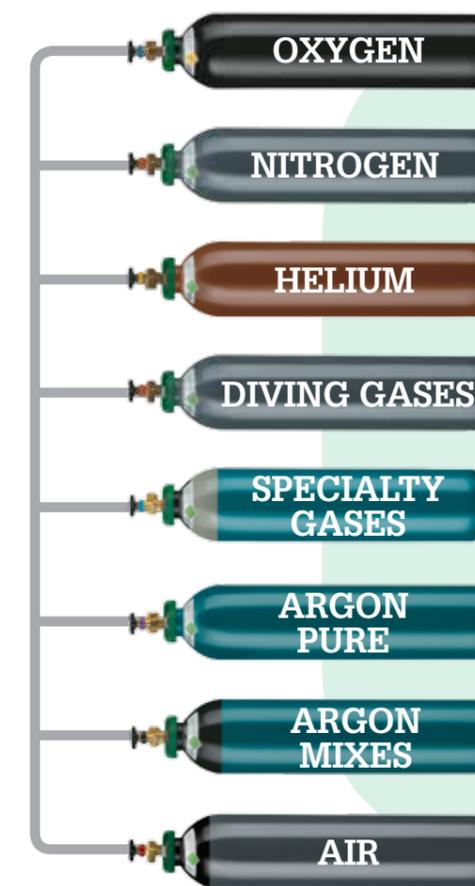

The Supagas point of difference...
all your needs from one source.

Supagas has invested in purpose-built and certified offshore pre slung racks and cages – fully approved to Standards DNV2.7-1, AS/EN12079.

Our cylinders are rated to 300BAR working pressure with a selection of racks manifolded to make them quicker and simpler to use. Manifold and non-manifold gas racks include:

Supagas Service

Supagas provide all the gases, services and associated equipment you need to make your job run to plan. Our operations are geared to help meet tight production deadlines. Whether you're involved in exploration, drilling maintenance or installation, Supagas has the experience and resources to be on hand with the right solution.

Dredging, pipe laying, final installation and tie-in activities all require industrial gases supplied in dependable TOUGH containers. Supagas understands the particular demands of the resource industries and ensures that all its products are built to withstand the rigours of specialised construction on sea and land.

Supagas Certainty

Supagas understands the absolute imperative of ensuring all your industrial gases are supplied on time and ready to use on your site or terminal offshore support vessels. Whether you're working on a construction barge, platform, laying pipe, putting down a Riser Access Tower or SUBSEA Coolers, Supagas products help you get the job done with a minimum of fuss.

Supagas manufactures, compresses and fills industrial gases at its own facilities. So we are better placed to deliver anywhere, anytime while offering superior service and savings on cylinder and pack rental. It means you carry significantly less stock. We supply remote locations in western and northern Australia with round trip deliveries up to 2000km. Our services have extended to Gladstone, Roma and Chinchilla in Queensland.

Supagas has a reputation for genuine personal service, safety culture and reliability. We are also known for our can-do response to unplanned callouts – often after-hours and at weekends.

In effect, we are always there for our customers offering them a real choice in supply and service.

Supagas supports a wide range of customers in the Oil and Gas and Mining Industries, with a substantial track record already established with small and large scale projects, throughout Australia.

Supagas Values

Quality Assurance

Supagas Pty Ltd is committed to comply with the requirements of ISO 9001-2008 and to continually improve the effectiveness of our Quality Management System.

We review the Quality Management System and the quality policy on a regular basis to ensure effectiveness and suitability to the organisation.

Everyone at Supagas understands we must provide a safe environment for both our employees and the wider community. We are therefore committed to implement and maintain a continual improvement approach throughout the organisation whilst also meeting all applicable statutory and regulatory requirements relevant to our field of supply.

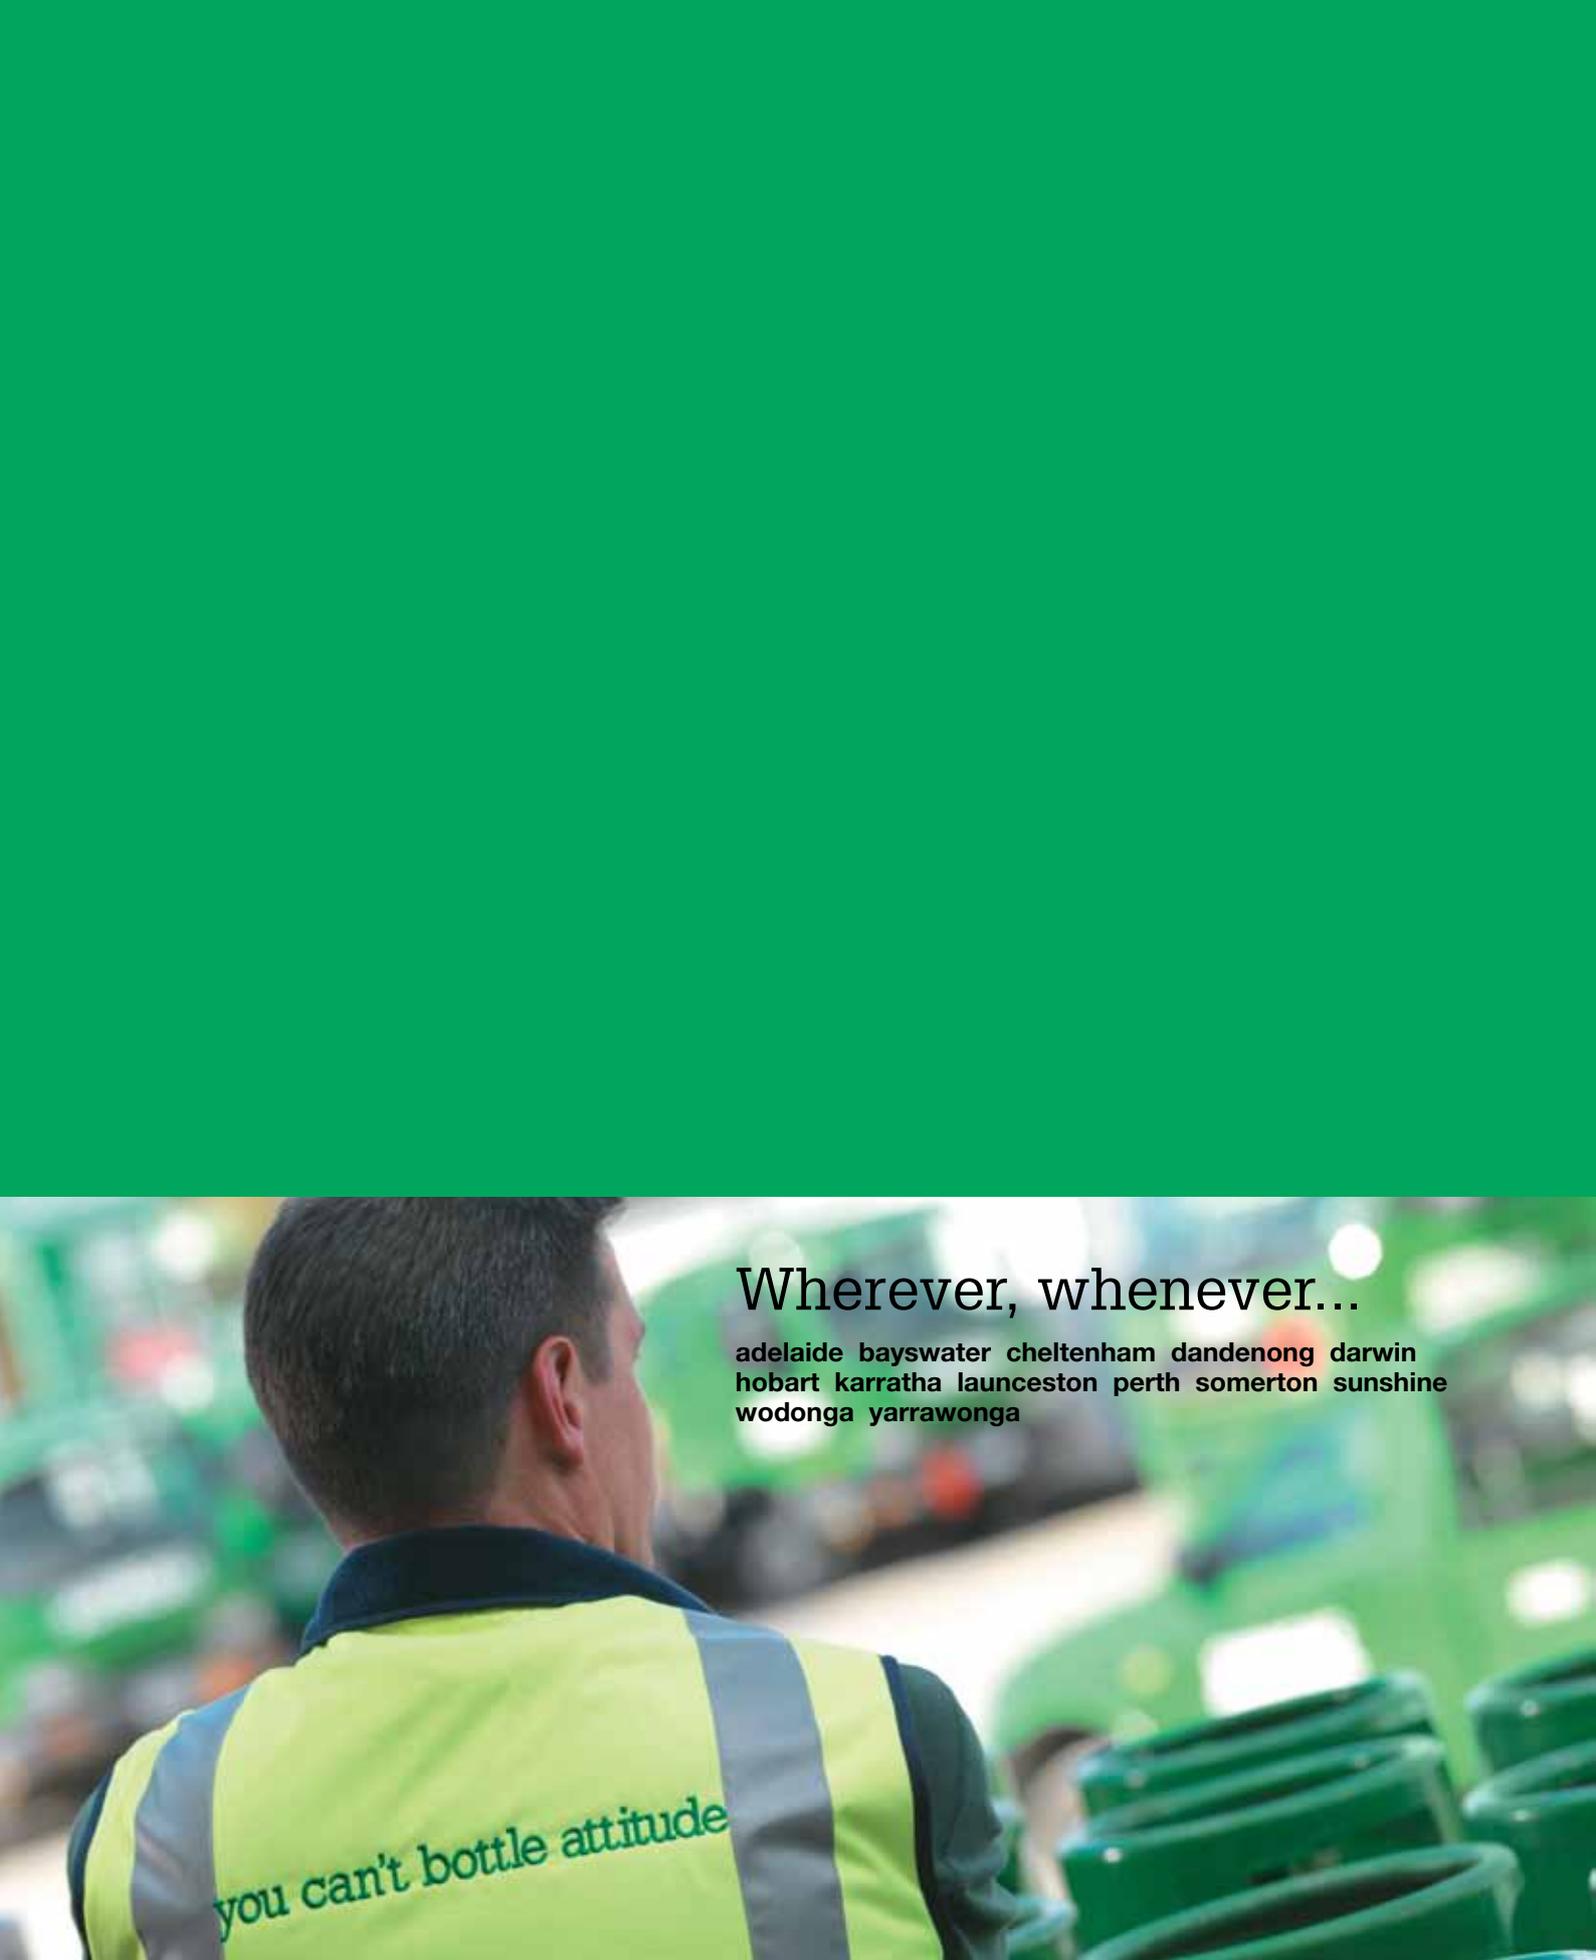

Safety and Environment

Supagas can only continue to operate successfully by demanding that we place priorities on the health and safety of employees, customers and the general public.

Supagas is committed to superior service and delivery of quality products without compromising safety or the environment.

Supagas will always strive towards zero incidents in our operations. To help achieve this we train, challenge and enable our employees to implement improvements so they can contribute to safety performance and personal satisfaction.

At Supagas it is an absolute requirement that we comply with legislation, relevant codes and standards and ensure strict adherence to company procedures. We therefore encourage people to report incidents and unsafe practices so that we may continue to improve our safety performance.
