YES WE CAN!

A large, red industrial heater is the central focus of the image. It has a prominent circular metal mesh cover on its front. The heater is set against a background of a factory floor, with a green semi-transparent overlay at the bottom. The text 'Industrial Heater Guide' is printed in white on this green overlay.

Industrial Heater Guide

Blow Heater

The Blow Heater is predominately used for industrial heating and is perfect for getting rid of the early morning chill in your workplace. Available in different sizes, the Blow Heater provides the warmth you need, fast.

Features:

- 220 - 240 Volts electricity supply
- Approved by the Australian Gas Association
- Connects to a 45kg LPG cylinder
- Odourless operation, no fumes
- Safety shut-off gas/flame/fan failure and overheat

Safety information:

- Not designed for indoor residential use
- Allow a minimum room size as listed on the heater
- Permanent ventilation to outside atmosphere must be provided

SA Global approved
