LPG for Home

SUPAGAS

YES WE CAN!

LPG Cylinders

More and more people are turning to LPG to power their home because of its many benefits and advantages. Our 45kg LPG cylinders are the perfect solution for all your heating, hot water systems and cooking needs at an affordable price.

Gas hot water systems

LPG hot water systems heat the water as required, which means you only use gas when your hot water tap is turned on. This is an environmentally friendly and cost effective alternative for water heating. Using LPG can reduce your domestic greenhouse emissions by a massive 50% to 70%.*

Cooking

LPG provides instant heat for cooking and easier temperature control. LPG stoves are readily available from all major chains and generally more aesthetically appealing than electrical stoves.

Indoor heating

Heating your home during those cold winter months does not need to be an expensive exercise. LPG is a cost effective alternative to fireplaces and reverse-cycle air-conditioning units. You can have the warmth and charm of a fireplace, but without the cleaning and maintenance of a fireplace.

Outdoor heating

Outdoor gas heating allows you to entertain outdoors all year around. Supagas supplies a range of gas heaters for residential use. View our latest range online or contact your local branch today for heaters available in your area.
