

SUPAGAS

YES WE CAN!

Offshore and Mining Resource Guide

Connect With Us

Supagas is a subsidiary of the Nippon Sanso Holdings Group and a leader in the supply of innovative gas solutions to a range of customers. Supagas provides a comprehensive list of products and services, designed to facilitate your current and future needs. Supagas is a leading supplier of LPG, medical, specialty, welding, bulk, hospitality and industrial compressed gases.

The expanding range and experience allows Supagas to tailor a solution that will best suit your requirements. As a fast-growing nation-wide company, and rapidly building a reputation for growth and success based on exceptional 'YES WE CAN' customer service, by offering quality products. Your business can take full advantage of Supagas' industry knowledge, whether it is engineering design, an application improvement or product advantage.

Supagas' state-of-the-art facilities allows us to offer multiple gas types, gas products, bulk liquid gases and specialty gases from state-of-the-art manufacturing plants as well as analytical and calibration services from our specialised laboratories. This helps us to better service our customer's needs and requirements. Our competitive advantage is on reliable delivery, fast and personal responses to queries and outstanding customer service. Today, Supagas has multiple distribution centres, branches and agencies growing nation-wide, providing a fast and reliable service as well as free delivery to most geographical areas to ensure quality service every time.

Supagas has been supporting Oil and Gas and Mining Industries in regional and remote parts of Australia since 2010.

Production, Distribution & Manufacturing Facilities

Supagas is a major supplier to the Oil and Gas and Mining Industry with significant production and distribution facilities in Karratha, WA and Darwin, NT.

The Karratha operation is the largest Liquid Nitrogen and Oxygen production facility in the Pilbara enabling Supagas to offer outstanding support – whether it is long distance deliveries or highly responsive turnaround for off-shore and mining operations.

The Darwin operation produces Acetylene and industrial compressed gases within the production plant. Remote Australia is supported by production and distribution facilities in Adelaide, Perth, Karratha and Darwin. Wherever we operate, we supply a full complement of gases, compressed or bulk refrigerated gases and services.

Supagas is a solutions partner working with our customers on planned and unplanned projects, offering full supply chain logistics support as well as Nitrogen Purging and Inerting services. The Supagas difference is supported and backed by state-of-the-art production facilities, networked logistics and above-and-beyond customer support.

**We are always
prepared for a
challenge.
Whenever. Wherever.**

Offshore Certified Racks

All Your Needs From One Supplier

Supagas supports a wide range of customers in the Oil, Gas and Mining Industries; with a substantial track record already established with small and large projects throughout Australia.

Service

Supagas provide all the gases, services and associated equipment you need to make your job run to plan. Supagas has experience and resources to be on hand with the right solution, as our operations are geared to help meet tight production deadlines. Whether you are involved in exploration, drilling maintenance or installation, we are there.

Dredging, pipe laying, final installation and tie-in activities all require industrial gases supplied in dependable tough containers. Supagas understands the specific demands of the resource industry and ensures that all its products are built to withstand the rigours of specialised construction on sea and land.

Certainty

Supagas understands the absolute imperative of ensuring all your industrial gases are supplied on time and ready to use on your site or terminal offshore support vessel. Whether you're working on a construction barge, platform, laying pipe, putting down a Riser Access Tower or SUBSEA Coolers, Supagas' products help you get the job done with minimum fuss.

Supagas manufactures, compresses and fills industrial gases at our own facilities so we are better placed to deliver anywhere and anytime. In offering superior service and savings on cylinder and pack rental, it means you carry significantly less stock. We supply remote locations in Western and Northern Australia with round trip deliveries of up to 2000 km. Our services have extended to Gladstone, Roma and Chinchilla in Queensland.

Supagas has a reputation for genuine personal service, safety culture and reliability.

In effect, we are always there for our customers; offering them a real choice in gas products and exceptional service.

We are always here to provide exceptional service. Whenever. Wherever.

Quality Assurance

Supagas is committed to comply with the requirements of ISO 9001-2019 and to continually improve the effectiveness of our Quality Management System.

We review the Quality Management System and the quality policy on a regular basis to ensure effectiveness and suitability to the organisation. Everyone at Supagas understands we must provide a safe environment for both our employees and the wider community. We are therefore committed to implement and maintain continual improvement in our approach throughout the organisation, whilst also meeting all applicable statutory and regulatory requirements relevant to our field of supply.

Safety & Environment

Supagas can only continue to operate successfully by demanding that we place priority on the health and safety of employees, customers and the general public.

Supagas is committed to superior service and delivery of quality products without compromising safety or the environment.

Supagas will always strive towards zero incidents in our operations. In helping to achieve this, we train, challenge and enable Supagas employees to implement improvements so we can contribute to safety performance and personal satisfaction.

At Supagas it is an absolute requirement to comply with legislation, relevant codes and standards to ensure strict adherence to company procedures. Supagas therefore encourages people to report incidents and unsafe practices so that we may continue to improve our safety performance.
