

Supa Alloy 25

Description

Supa Alloy 25 is an argon/helium based mixtures and is inert, non toxic, colourless and odourless. Supplied in high pressure metal cylinders.

Supa Alloy 25 is used in GMAW and GTAW for aluminium and aluminium alloys (Supa Alloy 25 up to 6mm).

Supa Alloy 25 is faster than argon, producing flatter, smoother, broader weld beads with greater penetration, fewer defects and improved productivity. It does not produce as fierce arc as Supa Alloy 75 and gives less chance of burn through in thin sections.

Applications

- MIG and TIG welding for Aluminium and Alloys up to 6mm

Hazard statement(s)
